

T6M10-C- Power Distribution Block 12V

- **Easy Installation**

It is installed on the panel surface with screw mounting holes for installation in any direction.

- **Stable Performance**

Nickel-plated brass contact plate has low resistance and good conductivity to ensure the flow and stability of current.

- **Sturdy Construction**

All power distribution connection blocks are manufactured with high-quality materials, ensuring mechanical strength and durability.

- **Safety Protection**

The base is made of flame-retardant plastic to protect the safety of equipment and people.

- **Wide Application**

It is suitable for cars, RVs, trucks, boats, solar energy, and other electrical equipment, etc.

T6M10-C Datasheet

Product Size (L*W*H)	178 * 38 * 46 mm (7.01" * 1.48" * 1.82")
Terminal Studs Size	6 * M10 (3/8")
Stud Material	Stainless steel
Base Material	Nylon, fiberglass
Max Operating Voltage	48V DC / 300V AC
Continuous Current	300A
Color	Red/Black
